

## **Abstract**

The present invention discloses a car headrest cover with protective and beautifying features, which is primarily used for a car headrest having a video device. By means of an  
5 accommodating space on the car headrest, a video device having a viewing window is installed on the car headrest at a position corresponding to the headrest cover. A protective unit is disposed on the headrest cover corresponding to the position of the viewing window, and a beautifying unit is disposed at the external surface of  
10 the protective unit. The foregoing components constitute a car headrest cover for protecting a video device, which has the dustproof, sun block, and antitheft features, and the beautifying unit with animal or doll styles can further adds an artistic effect to its appearance.
